### Descriptif de l'éditeur

---

TotoCalculator 2 improves your chances to win on the soccer betting games Toto, Lotofoot, TotoCalcio... The application calculates the optimal distribution of the tips on your tickets by supplying lines that have - each line compared with all other lines - a minimum of common tips. The resulting distribution also yields a well-balanced ratio of likely and unlikely tips.

The main advantage of TotoCalculator 2 as compared with a usual wheeling system is the flexible amount of tips 1, X and 2 (resp. 1, 0 and 2 in other parts of the world) that can be set for every match. You are not bound to a fixed allotment determined by the system but can specify the exact chance for every result ranging from 0.0% to 100.0% and you can also use odds of bookies to let TotoCalculator 2 compute the chances for 1, X and 2.

Tips can be printed directly to the tickets. The output to the printer is adapted with a special format editor.

The application runs in English, German, French, Italian and Swedish.
