Descriptif de l'éditeur

Seven great arcade games in one package. Match the colors and pop the bubbles. Those games are as addictive as Tetris and even more fun! All the games of Bubble series combined in one! Now you can install these games - Bubble Shooter, Bubble Thriller and Bubble FlyTrix in one go. Now you can choose: download, try and register these games one by one, or in a single pack. Online contest for best players is set up. Registered players of other games in this series get a huge discount.

Try it and you'll never forget that tickling feeling when a flock of bubbles flies in and you never know if they are going to end the game. The rules are simple, using the stylus you burst bubble and all the bubbles of the same color next to it blow up too, and others slip upward and fill the gaps. The more bubbles burst the more points you get. This is the main goal, actually - to get as many points as you can. Then you can take part in the online championship. This game contains three games with different playing fields and physics of the bubbles' motion. These games have common rules and share the same high scores table. You can pick the one you like, all they have their good sides. Various skill levels differ by the number of shots that you are allowed to fire without success. Bubble Golden Pack 2 is compatible with COLOR devices working under Palm OS 3.5 or above: Palm IIIc, Palm m505, Visor Prism, Sony PEG N700C, Sony PEG N710C and others that support 320x320 resolution and 65000 colors.
