Descriptif de l'éditeur

On your USB drive or your laptop, do not leave your confidential information more accessible.

And what could be more banal than Windows calculator !

No attracting attention and yet it has the appearance of adigital code.

This calculator, clone fully operational, is a very discreet safe allowing you to move your IDs, passwords, ... without fear of consequences in case of loss or theft.

After entering your PIN, it will encrypt and 'swallows' the file you have chosen.

Safe Calulator exists in English, French, Italian, German, Spanish, Portuguese.

COMMANDS

- Enter your PIN in memory (key [MS]), the calculator goes into safe mode.
- Browse the directory and select a file, it stores it encrypted in its own executable file.
- Erasing memory (key [MC]) delivers the standard calculator mode.
- Subject of course you enter your PIN, you shall return it, or display, or replaced.
- The defaut PIN is '123'.
- Your new PIN must be a number from 1 to 32 numbers, positive or negative, integer or decimal!
- For a description of controls, click [Help] or type [F1] in safe mode.

INSTALL

- No install needed
- No modification of the registry
- This Safe Calculator does not contain spyware, adware, or other virus
