Descriptif de l'éditeur

Manage all your passwords and websites with the ability to open websites and fill your information. You can automatically click and open any website in your list, and fill in the password and user id information. This also includes an option to store all your password data on diskette or any other external device to better secure your passwords, as your password files will not even exist on your pc if you choose this option. You can also print a list of all your passwords and websites for safe storage, and you can add, update, and delete websites and passwords in your list. You can also easily swap between your password list and browser screen, and easily select and open other websites in your list. (Runs on all Windows systems).
