## Descriptif de l'éditeur

Shapes is a game which can be played using different shapes and the game ends when there are no more adjacent similar shapes on the board. To play the game, click on the shape you want to eliminate from the board and if it has similar adjacent shapes, then the whole bunch of shapes will be removed from the board. Continue the same way trying to remove all the shapes from the board. In case you succeed, a 500-points bonus will be added to your score and the game continue with a new full-of-shapes board. There are 3 game levels and the scores for each of them will be kept in the registry. You can save the game and play it at a later time using the provided command options.
