Descriptif de l'éditeur

This software MP3 player gives fast acces to all your MP3 songs in your collection. Shows your own MP3 collection the same way as the download websites. Various Artist albums are recognized and shown differnet then single artist albums. Keyconcept is the alphabet toolbar that lets you select the bands starting at the desired character. Use the rename tool and the auto tag tool to organize you songs. Edit the song properties to change the embedded ID3 tag information. Use the Excel import tool to add information that you received in tabular format (i.e. the origin country of the band). If you like you can ceate multiple databases. For example for NewMP3, Classical. You can setup the databse with cyrillic alphabet if you own russian/greece music.
